

designed by
Ross Lovegrove

ergo

The Ergo collection is deeply tied to nature in its essence and in its appearance, because each item, from the bed to the large chest of drawers, the chaise-longue and the mirror, is made with responsibly sourced, renewable and recyclable materials. It is a tribute to a collection with fluid and essential forms – “created by the earth for the earth”.

features

by Ross Lovegrove

The bed has soft, reassuring contours, in which the materials seem to spontaneously take on the sinuous and organic lines typical of Lovegrove's style. The broad flowing headboard stretches out to form two bedside tables.

Frame in natural curved woods covered with sheets of wood, both FSC®-certified from forests managed correctly and responsibly, on the basis of rigorous environmental, social and economic standards.

Interlocking assembly with no metal parts. The water-based adhesives are formaldehyde-free. Natural wax finish.

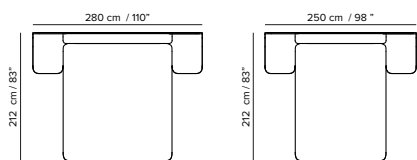

Mattress in 100% natural latex upholstered in a hemp fibre.

Headboard in 100% natural latex upholstered in a hemp fibre.

Bedspread in wool (40%), cotton (35%) and linen (25%).

The Ergo mattress has received the Human-Centered Design certification by Ergocert, the first European ergonomics certification body.

Here are some suggested arrangements.

Ross Lovegrove Extremely eco-conscious, he also takes a deeply human, enterprising and visionary approach to his projects and transforms whatever he touches with his optimistic spirit and innovative vitality, whether it be a camera, a car or a piece of architecture. With his creations he sparks a sense of wonder, establishes a connection that resonates on a deep level and delivers objects with a special feel.
